| Led strip with IP65 waterproof in silicone | | | | | | | |
|--------------------------------------------|----------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------|---------|--------------|-------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Full-color Led Strip | | | | | | | |
| NO. | Model | Description | Color | LEDs | LED Quantity | Power | Pictures for Reference |
| 1 | IH-music strip-30D50 | <ol style="list-style-type: none"> Strip comes with Music-sensing controller, no external controller needed Connected with DC 12V 2.5A power supply adapter directly (Not Provided) 30 pcs RGB Leds per 1m, 5m per roll IC WS2811 Size of PCB: FPCB with 10mm width | RGB | SMD5050 | 150LED | 30W |  |
| 2 | IH-12V-2811-30LED | <ol style="list-style-type: none"> External controller needed Input voltage: DC 12V 30 pcs RGB Leds per 1m, 5m per roll 1pcs IC controls 3 pcs LED Supplementary power supply circuit every 10 meters by red and white lights line IC WS2811 Size of PCB: FPCB with 10mm width | RGB | SMD5050 | 150LED | 36W |  |
| 3 | IH-12V-2811-60LED | <ol style="list-style-type: none"> External controller needed Input voltage: DC 12V 60 pcs RGB Leds per 1m, 5m per roll 1pcs IC controls 3 pcs LED Supplementary power supply circuit every 10 meters by red and white lights line IC WS2811 Size of PCB: FPCB with 10mm width | RGB | SMD5050 | 300LED | 72W |  |
| 4 | IH-5V-2812-30LED | <ol style="list-style-type: none"> Point control through an external controller Input voltage: DC 5V 30 pcs RGB Leds per 1m, 5m per roll 1pcs IC controls 1 pcs LED, IC and Led integrate into one Supplementary power supply circuit every 5 meters by red and white lights line Led with built-in IC WS2812 Size of PCB: FPCB with 10mm width | RGB | SMD5050 | 150LED | 45W |  |
| 5 | IH-5V-2812-60LED | <ol style="list-style-type: none"> Point control through an external controller Input voltage: DC 5V 60 pcs RGB Leds per 1m, 5m per roll 1pcs IC controls 1 pcs LED, IC and Led integrate into one Supplementary power supply circuit every 5 meters by red and white lights line Led with built-in IC WS2812 Size of PCB: FPCB with 10mm width | RGB | SMD5050 | 300LED | 90W |  |
| 6 | Universal strip-30LED-RGBW | <ol style="list-style-type: none"> Controlled by dedicated controller of universal strip (Controller provided) Connected with DC 12V 2.5A power supply adapter directly 30 pcs RGBW Leds per 1m, 5m per roll 1pcs IC controls 10 pcs LED Color white directly controlled by controller, CCT can be adjusted via an infrared remote control according to environment Color emitting: integration of Symphony, Multi-colored and Single color lighting Supplementary power supply circuit every 5 meters by red and white lights line Series IC WS2811 Size of PCB: FPCB with 10mm width | RGBW | SMD5050 | 150LED | 36W |   |

Marquee Strip

| NO. | Model | Description | Color | LEDs | LED Quantity | Power | Pictures for Reference |
|-----|--------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------|---------|--------------|-------|--------------------------------------------------------------------------------------|
| 1 | 12V-RGB-Marquee Strip | 1. Strip comes with controller, no external controller needed 2. Features: single color gradual change, jumping change, flashing, strobing, single color chasing from start to finish, running water etc 3. Connected with DC 12V 2.5A power supply adapter directly (Not Provided) 4. 30 pcs RGB Leds per 1m, 5m per roll 5. IC WS2811 6. Size of PCB: FPCB with 10mm width | RGB | SMD5050 | 150LED | 36W |  |
| 2 | 12V-Single color-Marquee Strip | 1. Strip comes with controller, no external controller needed 2. Features: single color gradual change, strobing, single color chasing, running water 3. Connected with DC 12V 1A power supply adapter directly (Not Provided) 4. 30 pcs single color Leds (3 chips SMD) per 1m, 5m per roll 5. IC WS2811 6. Size of PCB: FPCB with 10mm width | White, Blue, Green, Red, Yellow | SMD5050 | 150LED | 36W |  |

Controller (for 2811/2812 strip only)

| No. | Model | Specification | Type | Pictures for Reference |
|-----|------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|---------------------------------------------------------------------------------------|
| 1 | IH-312 | 1. Support IC: WS2811/2812 2. 12 ports available 3. Each port 20-200 pixels with custom adjustment 4. Voltage: 5V-24V 5. With synchronous induction of music rhythm and sound volume, LED strip can achieve dynamic effects | Music-sensing controller |  |
| 2 | IH-DMX512-Decoder | 1. WS2811, WS2812 decoder 2. 512 channels 3. Voltage: 5V or 12V 4. By TTL signal into DMX512 signal | DMX512 decoder |  |
| 3 | IH-T8000 | 1. Full color controller 2. Voltage: 5V 3. Off-line control (SD card) 4. 8 kinds of adjustable speed of change 5. Can control 8192 pixels, each port 1024 pixels 6. Port quantity: 8 ports 7. Can support various kinds of IC (pls refer to specification for details) | T8000 controller |  |
| 4 | IH-F5V-Mini-Controller | 1. Full color mini controller 2. Voltage: 5V or 12V 3. 5 kinds of built-in change models: gradual change, jumping change, chasing running water etc 4. 8 kinds of adjustable speed of change 5. Can control 300 pixels | 5V/12V mini controller |  |
